# Flow-Liner® Cutter

The **Flow-Liner® Cutter** is a robotic lining reinstatement cutter especially designed for 3" to 5" ID lined pipes. It is capable of maneuvering around 90 degree bends with ease in 3" to 5" ID lined pipes. With its LED lighting and control unit with color camera, the Flow-Liner® Cutter is the perfect tool for reinstating branch lines. The basic unit comes with the necessary nitrogen hookup and assembly. 35 CFM air compressor required (not included).
